Brihaspati Vidyasadan

Naxal, Kathmandu

COMPANY PROJECTS

○ Mobile Finance Technology (Mofin) Admin/Client Portal mobanking.mo-finance.com

React, Vite, Chakra-ui, react-query, axios

Admin / Client portal to setup, view, manage, configurations for the mobile application [Mofin](#) which is a Mobile Banking app for financial institutions to perform activities like viewing account details, balance statement and making various transactions by the users associated with the institution.

Main Roles/Responsibilities:

- Manage and modify the v1 portal based on older outdated technologies.
- Initiate and involved in most of the development for portal v2 with newer and more long term support technologies / packages.
- Lead a team of two motivating and supervising them to hone their skills and improve code quality as well as teaching them best code practices for the project.

○ Internet Banking (Mofin)

React, Vite, Chakra-ui, react-query, axios

The web portal for [Mofin](#) app which is a Mobile Banking app for financial institutions to perform activities like viewing account details, balance statement and making various transactions by the users associated with the institution.

Main Roles/Responsibilities:

- Initiate the project and add all configurations including login flow, routing, api interceptors and providers.
- Implement services for utility bill payments.
- Add other customer information pages including limits, account details, transaction details, statements, etc.

○ Subisu Customer Web Portal customer.subisu.net.np

React, Vite, MUI, react-query, axios

Customer portal for Subisu customers and admin to manage users and customer detail with payment integration for bill payments.

Main Roles/Responsibilities:

- Adding features according to requirements.
- Bug fixes and code enhancements.
- Manage and supervise a team of developers for new requirements.

○ Central Agricultural Laboratory (CAL) Portal

React, Vite, MUI, react-query, axios

Portal for Central Agricultural Laboratory Nepal employees to add/edit, create reports about seed/plant/soil testing etc.

Main Roles/Responsibilities:

- Adding features according to new requirements.
- Bug fixes and code enhancements.

PERSONAL PROJECTS

○ Space Float Music Website spacefloatmusic.com

Next-14, Postgres, Prisma, Next-auth, Typescript, Chakra-ui, react-query, s3, nginx

A website with authentication and admin panel for Space Float which is a revolutionary platform that combines blockchain technology and artistic expression to provide musicians and their fans with the opportunity to own and sell music royalties. It aims to transform music tracks into liquid assets, empowering talented artists and engaging a vibrant community of fans. The website represents a beacon of hope within the music industry, challenging traditional gatekeepers and championing the democratization of music.

○ TDM Website tdm-ten.vercel.app

HTML, SCSS, JS, GSAP, Web3-Forms

A interactive and animated website for Tempered Digital Music(TDM) Initiative which is a tech-driven global recording label, music distributor, and marketer leveraging in-house algorithms and machine learning.

○ Westward Constructions westwardconstruction.com

HTML, CSS, SCSS, JS, Web3-Forms

Developed a functional static website for Westward Construction Ltd, a leading construction company based in the UK. The website showcases the company's expertise in delivering exceptional quality and unmatched craftsmanship in architectural construction projects.

○ Lost Ravens EPK lostravens.com

HTML, CSS, SCSS, JS, WowJs, Web3-Forms

A website resume for the record label "Lost Ravens" that provides the essential information to showcase the artist's latest releases, discography, press releases, etc. Including signing up for newsletters and releases.

○ Generative Art using p5.js en-ryuu.github.io

HTML, CSS, p5.js , jquery

An interactive web-app where the user can create and learn about generative art.

This website features a sketch named Weave.js made from scratch using 3 different concepts (Kaleidoscope, perlin noise and bezier curves) which generates unique and random symmetrical generative art with a huge range of customization option.

Direct Link for the sketch: <https://en-ryuu.github.io/weave.html>

It is also available as a live wallpaper for Wallpaper Engine on [Steam](https://steamcommunity.com/sharedfiles/filedetails/?id=2844444444).

○ Portfolio abhishekp.com.np

NextJs, CSS, SCSS, Web3Forms

My personal portfolio made using Next.Js which contains only concepts of routing, components and javascript with clean UI.

○ Restaurant Website Template ryuu-restaurant.vercel.app

HTML, CSS, SCSS, JS

A animated and interactive website template for restaurant.
